

## PROCESSING AIDS / ADDITIVES

**AFTER 50 YEARS, AECI FOOD & BEVERAGE'S PROCESS ADDITIVES DIVISION HAS EVOLVED FROM A SINGLE PRODUCT MANUFACTURER INTO A SUPPLIER AND PARTNER TO INDUSTRY OF SPECIALISED RELATED PRODUCTS. AFTER ALL, WHEN THE PRODUCTS YOU MAKE WERE FORMED MILLIONS OF YEARS AGO, THEN 50 YEARS IS ONLY THE BEGINNING**

AECI Food & Beverage's Process Additives division manufacture products from the raw material perlite.

AECI Food & Beverage's Process Additives division has evolved from a single product producer into a supplier and partner of companies that require a vast range of specialised products, used in applications such as the insulation of buildings, filtration of liquids and as a growth medium in the agricultural industry.

AECI Food & Beverage's Process Additives division manufactures perlite filter aids for the food and beverage industry. They supply filter aids to a wide range of customers in the glucose, edible oils, spreads, and beer and wine industries.

The filter aid applications can be used in pressure leaf filters and rotary vacuum filters. Infigro can supply perlite and cellulose filter aids for all applications.

AECI Food & Beverage's Process Additives division has two manufacturing units based in Olifantsfontein that produce all the company's perlite products. The company also has distribution warehouses in Cape Town, Midrand and Durban. It is a dynamic and versatile organisation with the backing of a large multinational corporation. AECI Food & Beverage's Process Additives division places a significant emphasis on sustainability. The management team understands the company's responsibility to reduce its impact on the environment. This is particularly important given that its Olifantsfontein operations border a residential area. The company has acquired ISO9001 and ISO 18001 accreditation.
